PRODUCT INFORMATION

SSL-100L Large Format Vertical Sleeve Labelers

Sleeve Seal's new large format labeler offers XXL container capacity

Automated, oversized labeling just got easy. Our new SSL-100l labeler handles containers up to 8.5" in diameter with extra long label lengths. Sleeve Seal's "all day long, all day strong" reliability has been applied to an extra strength drive train to accommodate your large format packaging requirements.

Product Description & Specifications

Label Drive Train

The drive train of our labelers is constructed of high-grade, precision machined parts that are all built for a single purpose – to deliver a consistent stream of labels to your containers. This robust, easy to adjust system is at the heart of all our high-speed sleeve label systems.

The fast change mandrel provides the perfect sleeve profile to meet the incoming container no matter what shape or speed. It is also ideal for easy incorporation of new future formats.

Access Cabinet

All Sleeve Seal labeling machines are housed in heavy gauge stainless steel cabinets made with removable service doors for ease of maintenance and safety. Operators can manage operation and changeovers using our purpose built HMI and synchronized adjusters.

Cutter Box

Our patented cutter box utilizes four to six synchronized cutting blades for fast, precise cuts that won't leave jagged film ends. The unique modular design allows for easy change of blades or quick, tool-less changes to other cutter boxes when changing label format or container size.

Sleeve Seal cutter boxes use common, affordable utility blades that can be found in a local hardware store. Other blade types designed for use in harsh environments are also available.

SSL-100L Production Rate:	100 CPM* (Label Length 100mm)
Bottle Sizes:	120 - 215 mm diameter
Label Length:	75 - 220 mm
Label Thickness:	50 – 80 micron
Materials:	PVC, PETG, OPS

* Based on a label length of 100mm
