

## PRODUCT INFORMATION

# SSL-100L Large Format Vertical Sleeve Labeler

The SSL-100L large format vertical sleeve labeler handles XXL containers up to 215mm / 8.5" in diameter with extra-long label lengths at up to 100CPM. Sleeve Seal's famously reliable drive train has been adapted to apply large format shrink labels for your large format packaging requirements in a modular system design that allows for easy adaptation to existing conveyance systems.

## PRODUCT DESCRIPTION & SPECIFICATIONS

### Drive Train

Sleeve Seal's new large format labeler offers XXL container capacity with an upscaled drive train that is a durable adaptation of our standard workhorse drive train engineered around Allen Bradley controls, plus precision machined components that are designed for accuracy and durability. Our drive train design offers repeatable performance in a mechanically simple system that uses modular change parts that make switching between formats easy. All of our mechanical systems can be adjusted by the operator with no tools, ensuring Sleeve Seal labelers the reputation for operator friendly, long lasting machines capable of efficiencies of 99.5%. All Sleeve Seal labelers perform precision labeling thanks to well-engineered components managed by Allen Bradley servos and controls.

### Access Cabinet

Every Sleeve Seal machine is housed in a heavy gauge stainless steel cabinet and includes lockable service doors for ease of maintenance and safety. Access to the front of the cabinet is managed with Allen Bradley safety interlock switches to ensure safety. Operators are able to manage operation and changeovers using a customized HMI and synchronized adjusters.

### Cutter Box

Our patented cutter box design utilizes four to eight synchronized cutting blade heads for fast, precise cuts that won't leave jagged film ends. Sleeve Seal cutter boxes use common, affordable utility blades that can be found in a local hardware store with other blade types available for use in harsh environments. Sleeve Seal's modular design allows for easy replacement of blades and fast changeovers between formats.

SSL-100L Production Rate:	100 CPM (Label Length 100mm)
Bottle Sizes:	120 - 215 mm diameter
Label Length:	75 - 250 mm
Label Thickness:	40 - 80 micron (µm)
Materials:	PET, PVC, OPS
